MYITTA KYAEMONE
HIV/AIDS Care Center
Yan Aung Mye Ward
Kyaikimone
North State Myanmar

Questo ragazzo ha nove anni, si chiama Soe Thura, frequenta la terza elementare ed è figlio unico; quando i suoi genitori sono mancati quattro anni fa il dottore che curava la famiglia del ragazzo l'ha portato da noi. Per questa ragione ha sofferto un trauma e ha bisogno di tanto affetto.

È un ragazzo intelligente che impara in fretta, a cui piace giocare a calcio e andare in bicicletta (la bici della foto l'ha ricevuta a Natale con i soldi che avete mandato).

L'anno scorso abbiamo avuto difficoltà a ricevere cure per L'AIDS per lui e altri cinque ragazzi. Per colpa delle ossa (una patologia ereditaria) è stato ospedalizzato per un mese a Yangon, ma adesso è sano e frequenta la scuola (l'anno scorso non è potuto andare).

(Suor Martha)

This boy is nine years and is in the Third Standard. He also got the bicycle as Christmas gift from the donation you sent. He loves cycling and playing football. He is the only child of the family. When both parents passed away four years ago the doctor looking after the family brought him to us. He was around 5 years. He has traumas as a child and needs special attention. He is a clever child and learns quickly

Last year we had difficulty getting HIV treatment for him and other 5 children. More than 2 months he was away going to Mandalay twice and at last had it in Yangon. Because of bone problem which is heredity, he was in hospital for a month in Yangon. Last year he was absent from school. But now he is healthy and attending classes. He loves cycling and got one last Christmas from your donation..
